# L sealing machines

# Alizé 3040 & Alizé 5060

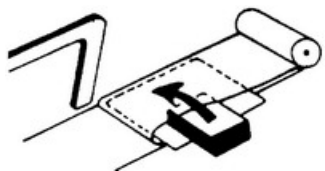

Sealing and cooling time settings can be adjusted through a flexible keyboard

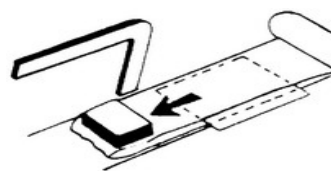

(1) Easy adjustment of product delivery tray height  
Optional manually operated tray raising and lowering feature: lever (1)

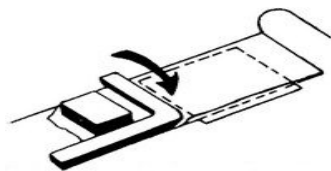

Operation sequence

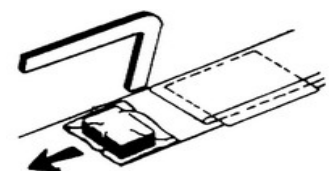

(1) Product inserted into the folded film on the loading plate

(2) Product moved into position in the sealing frame

(3) Seal cutting frame bar is lowered

(4) Product moves out in its film wrapping

ORA electrically heated L sealing machines can film wrap a product or a group of products from a reel of split-sleeve folded film.  
Automatic magnetic locking holds sealing frame in place  
Format size quickly changeable thanks to rapidly manipulated reel support and loading plate.  
Thermal perforation system and trimmings bin  
Adjustable product delivery tray height  
(mechanically operated with 1 "adjustable tray" option)  
Microprocessor control of electrical weld system helps you adapt to the required production rates and enables you to seal all types of PP PVC and LDPE film
